

Bon Secours Charity Health System's Screening Program

The on-site health screen is designed to assess general physical health, lifestyle, and disease risks. It provides specific suggestions for lifestyle modifications to decrease risks. Health screens are completely confidential and individual results are mailed to each persons home.

Components of Screen:

- **Non-fasting total cholesterol, HDL and glucose**
- **Blood Pressure**
- **Waist Circumference**
- **Height**
- **Weight**
- **Results Consultation immediately afterward with a Bon Secours Healthcare Professional**
- **Personal Health Profile**
- **Personal Health Report for each individual**

The Personal Health Report includes follow up recommendations and can be delivered on-site.

Complimentary Lunch and Learns are offered after the company views the aggregate Group Health Reports.

**Cost is \$51.00 per person.*
